

OpusFesta

Staff Workspace

Employee Guide

How to use **admin.opusfesta.com**

Accessing the workspace · Submitting approval requests · Clocking in & out · Writing reports

Who this is for: Every OpusFesta team member with a staff account.

What you will learn: Everything you need to sign in and complete your daily admin tasks — step by step.

Version 1.0 · Last updated 26 May 2026

Contents

1. Why this matters

Everything in the OpusFesta staff workspace — your hours, your approval requests, and your reports — feeds the same picture of how the company is running. When you use it properly, three things happen:

- **You get credit for your work.** Your clocked hours and submitted reports are the official record of what you did. If it is not in the system, it effectively did not happen.
- **Decisions get faster.** Approval requests (trips, payments, purchases) route straight to the right manager with an email notification, so you are not waiting on a WhatsApp reply that gets buried.
- **The business stays accountable.** Spending, attendance and progress are all traceable — which protects you, your manager, and OpusFesta if anything is ever questioned.

The one-line version

Clock in when you start, submit a request before you spend or travel, and write your report before you log off. Do those three things and the rest takes care of itself.

What you will find in the workspace

Task	Where	In short
Sign in	admin.opusfesta.com	One secure login for everything below.
Approval request	Approvals	Ask for sign-off on a trip, payment, purchase, contract and more.
Clock in / out	My time clock	Record your working hours; tracked automatically.
Reports	My reports	Daily, weekly or monthly updates your team leads can read.
My tasks	My tasks	Tasks assigned to you — start, complete or reopen them.

2. Accessing admin.opusfesta.com

The workspace lives in your web browser — there is nothing to install. You can use it on a laptop or a phone.

Before you start

- **A staff account.** People Ops creates this for you using your work email. If you have never signed in before and cannot get in, that account may not exist yet — ask People Ops to add you.
- **A modern browser.** Chrome, Safari, Edge or Firefox, kept reasonably up to date.
- **Your email inbox handy,** in case you sign in with an email code and need to confirm your identity.

Step by step: signing in

1. Open your browser and go to admin.opusfesta.com
2. You will land on a secure sign-in screen. Enter the email address People Ops registered for you.
3. Complete the sign-in prompt — either type your password, or enter the one-time code sent to your email, depending on how your account is set up.
4. You will arrive at the **Dashboard**. On the left is the navigation sidebar — that is how you reach every feature in this guide.

Find your way around

The **left sidebar** is your menu. The three links you will use most sit right at the top:

- **My time clock** — clock in and out
- **My reports** — write and submit reports
- **Approvals** — submit requests for sign-off

Press **Cmd/Ctrl + K** anywhere to open search and jump straight to a page.

If you get stuck signing in

What you see	What to do
"No workforce record yet — ask an admin to add you."	Your login works, but you have not been linked to a staff profile. Message People Ops to set one up; clock-in and reports unlock once they do.
Your email is not recognised at sign-in	You may be using a personal address. Sign in with the exact work email People Ops registered.
You can sign in but the menu looks short	That is normal — the sidebar only shows the sections your role can access. The three "My..." links are always there.

3. Submitting a request for approval

Use **Approvals** whenever you need a manager to sign off on something before you act — a trip, a payment, a purchase, borrowing equipment, a contract, and more. Each request is its own little conversation: you fill in the details, pick who approves, submit, and everyone is notified by email.

The categories you can choose from

Category	Use it for
Business Trip	Travel authorisation — dates, location and purpose.
Borrow Items	Borrowing equipment or assets, with a return date.
General Approval	Anything that does not fit a dedicated workflow.
Contract Approval	Vendor, partner or service contracts.
Payment Application	Requesting a payment to a vendor, partner or staff member.
Bolt Service	Bolt rides for client visits, events or staff travel.
Job Referral Award	A referral bonus when someone you referred passes probation.
Procurement	A purchase request for goods or services.
Create RFQ	Issuing a request for quotation to vendors.

Step by step: create and submit a request

1. In the sidebar, open **Approvals**. You will see a tile for every category above.
2. On the category you need, click the green **New Request** button. (Clicking the tile name instead opens the list of existing requests in that category.)
3. Fill in the **Approval Subject** — a short summary, e.g. "Q2 vendor visit" — then complete the fields for that category (dates, location, amount, payee, products, and so on). Fields marked with a red asterisk are required.
4. Add a clear **Description**: the context, the business justification, and any links. This is what your approver reads first.
5. Open the **Approver(s)** tab and choose who should sign off. You can add more than one approver.
6. Click **Submit**. The status moves from *To Submit* to *Submitted*, and each approver gets an email letting them know it is waiting on them.

Tip — save now, submit later

Creating a request saves it as "To Submit" straight away. You can leave it, gather more detail, and come back to submit it when it is ready. Nothing is sent until you click Submit.

What happens after you submit

Your approver opens the request and takes one of three actions. You are emailed the outcome each time:

Approver action	Status becomes	What it means for you
Approve	Approved	You are cleared to go ahead.
Refuse	Refused	Declined — usually with a note explaining why.
Request More Info	Back to To Submit	They need more detail. Read their note, update the request, and submit again.

You can follow the whole history on the request itself — every submission, note and decision is logged in the activity feed on the right. **Refused or approved by mistake?** A request can be reopened as a draft and resubmitted.

Who approves what

Approval requests route to OpusFesta's managers (for example the Finance & Accounts managers, or the Owner account). **Pick the approver who owns the decision** — if you are unsure, ask your team lead which approver to choose for that category.

4. Clocking in & out

My time clock is how you record your working hours. You clock in when you start and clock out when you stop — the system does the counting, the totals and the weekly summary for you.

Step by step

1. In the sidebar, open **My time clock**.
2. At the top you will see a big card with your name, the live time, and one large button. When you are off the clock it is a green **Clock in** button.
3. Tap **Clock in** when you start work. The card turns to *On the clock*, and a live timer begins counting your shift.
4. When you finish — or are taking a long break — open the page again and tap the **Clock out** button (it replaces Clock in while you are on shift).

In and out must alternate

You cannot clock in twice in a row, or out twice in a row. If you try, the page gently reminds you:

"You're already clocked in. Tap Clock out first if you want to switch."

"You're not currently clocked in. Tap Clock in to start a shift."

What the page shows you

- **A live shift timer** counting up while you are on the clock, plus your expected end (start + 8 hours, shown as a target — not enforced).
- **Four quick stats:** hours Today, hours This week (against a 40-hour target), your average start time, and your last punch.
- **A week view** with a bar for each day Monday–Sunday, today highlighted, and your first-in/last-out times.
- **Recent activity** — a timeline of your last 12 clock-ins and clock-outs.

How your time is tracked

Every time you clock in or out, the system records a "punch". Each punch saves:

Recorded	Why
The exact time (to the second)	So daily and weekly hours are accurate.
Whether it was an in or an out	To pair shifts and total your hours.
The device and network you used	A light audit trail (your IP address and browser) for accuracy and fairness.
Your linked staff profile	So the hours land against the right person.

All times use **East Africa Time (EAT, UTC+3)** — Dar es Salaam time — so everyone sees the same clock. Your managers see the same punches in their **Timesheets** and **Performance** views, which is how attendance and hours worked are reviewed.

Honest, accurate punches

Clock in when you actually start and out when you actually stop. The record is shared with your managers and is the basis for attendance — keeping it truthful protects you as much as the company. If you forget to punch, tell your manager so they can correct it; do not try to "make up" hours later.

5. Writing a report

My reports is where you tell your team leads what you have been working on. You pick a report type, fill in a short form, and submit. Your team leads can read every report you submit.

Report types

The types available to you depend on your department. Common ones include:

Report	Cadence	What it captures
General Daily Report	Daily	What you worked on, blockers, and hours worked.
Marketing Daily Report	Daily	For Marketing & Partnerships — intro, meeting notes, vendor outreach, follow-ups, conclusion.
Weekly Report	Weekly	Highlights, completed, in progress, blockers, focus for next week.
Biweekly Report	Every 2 weeks	Summary, completed, in progress, blockers, focus for the next two weeks.
Monthly Report	Monthly	Summary, key achievements, metrics, challenges, goals for next month.
Quarterly Report	Quarterly	Executive summary, major achievements, KPIs, learnings, goals for next quarter.

Do not see a report type you expect? Templates are matched to your department. If yours is missing, ask an admin to set one up for your team.

Step by step: write and submit a report

1. In the sidebar, open **My reports**.
2. Under **Write a report**, click the report type you want. Each card shows its name and how often it is expected (e.g. "DAILY").
3. Set the **Date** (it defaults to today). For weekly, monthly and other multi-day reports you also set a **Period end** date.
4. Fill in each section. Required sections are marked with a red asterisk (*); optional ones are labelled "(optional)". Some sections are free text, some are number fields, and some are bullet lists where you click **Add item** for each point.
5. Not finished? Click **Save draft** — your report is kept privately and you can come back to it any time.
6. When it is ready, click **Submit report**. Required fields are checked, the status becomes *Submitted*, and your team leads can now read it.

Draft vs Submitted

Draft — saved, private, editable. Only you see it.

Submitted — shared with your team leads. You can still open it from your History to View or Edit.

You can file one report per type per day.

Writing a report your lead will value

- **Be specific.** "Called 6 vendors, 3 said yes" beats "did outreach".
- **Flag blockers early.** The Blockers section is how you ask for help without a meeting.
- **Keep it honest and short.** A report read in 30 seconds is more useful than a page nobody finishes.
- **Submit before you log off.** Pair it with clocking out so it becomes a habit.

Your daily rhythm, in three moves

When	Do this	Where
Start of day	Clock in	My time clock
Before you spend or travel	Submit an approval request	Approvals
End of day	Write your report, then clock out	My reports → My time clock

Need help?

If anything in the workspace is not behaving as this guide describes, or you cannot access a feature you need, contact People Ops or your team lead. Most issues come down to a staff profile that simply needs linking — a quick fix.
